

Gallopedia

From Gilani Research Foundation

March 2019, Issue # 576*

Compiled on a weekly basis since January 2007

Gilani's Gallopedia is a weekly Digest of Opinions in a globalized world - one window on global opinion polling compiled by Gilani Research Foundation

Who are we?

Gilani's Gallopedia is a weekly digest of opinions in a globalized world. It provides a one window access to Global Opinion Polls on a weekly basis. It is produced by a team of researchers led by Dr. Ijaz Shafi Gilani, and is a not for profit public service. It is co-edited by Mohsina Ahmed.

Our name reflects the rapid pace at which global polls are brought to the community of pollsters and other interested readers. Gilani's Gallopedia is not related to any polling agency and makes its selection from any publically available poll based on its relevance to our reader's interests. Over the years it has reported polls conducted by over 350 agencies and institutions.

▶ MENA:

576-1 [UAE: New research found men and women differ both in terms of what they are hoping to achieve and what they are doing to attain it](#) (Click for Details)

(UAE) The study finds that just under three in ten (28%) are happy to maintain their current weight while one in seven (14%) are looking to bulk up. The remaining 10% do not have any weight goals. Women are notably more likely than men to be prioritising losing weight (59% to 42%) while the opposite is true when it comes to bulking up, where one in six men (16%) want to bulk up compared to one in eleven women (9%). 576-6 [Can beloved retailer Toys R Us make a comeback?](#) (Click for Details)

(UK) Data from YouGov shows that Toys R Us' Buzz score (a net measure of whether consumers have heard anything positive or negative about the brand in the last fortnight) plummeted after news of the bankruptcy broke, from an already low -8.5 to -48.9. However, since then, their Buzz score has risen back to levels not seen since before the crash (-1.4) despite not having any stores open in the UK. When asked where they now currently shop, almost two fifths (38%) of former Toys R Us customers told us they currently shop at Argos and over a third (35%) at Wilko. (YouGov UK)

Topic of the week:

One in Twenty British Men Now Wear Makeup

► This page is devoted to opinions of countries whose polling activity is generally not known very widely or where a recent topical issue requires special attention.

UK: One in Twenty British Men Now Wear Makeup

More men use makeup to their boost confidence, hide blemishes, or accentuate their features than you may think.

A new YouGov Omnibus survey shows that one in thirty (3%) of men wear makeup either once a month (1%) or less (2%).

One in fifty men wear it on a weekly basis, and one in a hundred (1%) wear it every single day. An additional 1% puts it on between two and six days a week.

That means that one in twenty British men (5%) now wears makeup, to some extent.

One in ten 18 to 24 year old men have worn makeup in private

YouGov ran a follow-up survey to explore when and why men are choosing to wear makeup.

One in twenty five have worn it in private, such as at home. This rises to one in ten men aged between 18 and 24.

One in a hundred have worn makeup to look more professional at work, in a job where it's not specifically required - for instance, they were not models or TV presenters.

One in twenty five (4%) have worn it when going out with friends in the evening. One in fifty (2%) have worn it when going out with friends during the day, and the same proportion (2%) have worn it on a date.

Perhaps the most common reason for men to wear makeup is in the context of fancy dress. One in six men have worn makeup for a fancy dress event (15%), one in eleven (9%) for an amateur performance they were acting in, and one in twenty five (4%) for a specific themed performance they were seeing (like a drag show or Rocky Horror).

Some wear makeup for fun - for others, it's a confidence booster

When asked *why* they would wear makeup, men are most likely to state they simply "find it fun" (15%).

Another one in eight (12%) say they wear it to express their personality and creativity.

Page 6 of 8

Still, a considerable proportion wear it for similar reasons as women: to hide blemishes (13%) or a feature of their face they are self-conscious about (9%), or to generally boost their confidence (8%). One in nine (11%) wear it to make them feel good when dressing up for a special occasion. And for one in fifty (2%) it's simply a habit.
