

# Gallopedia

From Gilani Research Foundation

June 2019, Issue # 589-590\*

Compiled on a weekly basis since January 2007

Gilani's Gallopedia is a weekly Digest of Opinions in a globalized world - one window on global opinion polling compiled by Gilani Research Foundation

## Who are we?

*Gilani's Gallopedia* is a weekly digest of opinions in a globalized world. It provides a one window access to Global Opinion Polls on a weekly basis. It is produced by a team of researchers led by Dr. Ijaz Shafi Gilani, and is a not for profit public service. It is co-edited by Mohsina Ahmed.

Our name reflects the rapid pace at which global polls are brought to the community of pollsters and other interested readers. Gilani's Gallopedia is not related to any polling agency and makes its selection from any publically available poll based on its relevance to our reader's interests. Over the years it has reported polls conducted by over 350 agencies and institutions.

589-590-07 [When, exactly, were the “good old days”?](#) (Click for Details)

A common topic for polling is whether life was better at a certain point in the past: the 50s, the 60s, the 70s... These surveys invariably find that many believe in the concept of “the good old days”. Our data reveals that between 31% and 41% of Britons believe that life was better in every past decade from the 2000s all the way back to the 60s than it is now. This figure then drops to just 16% for the 1950s, and again to only 4% for the 1940s. It then remains at about this level for all older decades, as well as the 19<sup>th</sup>, 18<sup>th</sup> and 17<sup>th</sup> centuries.

## Topic of the week:

# The countries where people are most dissatisfied with how democracy is working

► This page is devoted to opinions of countries whose polling activity is generally not known very widely or where a recent topical issue requires special attention.

## The countries where people are most dissatisfied with how democracy is working

Across 27 nations [surveyed by Pew Research Center](#) in 2018, people were more dissatisfied than satisfied with the way democracy is working in their country.

This held especially true in a dozen countries where negative views of democracy outpaced positive by more than 10 percentage points.

The 12 countries most dissatisfied with their democracy included four –

Mexico, Greece, Brazil and Spain – where eight-in-ten or more were dissatisfied with the state of democracy, and another five where six-in-ten or more expressed dissatisfaction: Tunisia, Italy, South Africa, Argentina and Nigeria. The United States was close behind, with 58% expressing unhappiness with the way democracy is functioning.

People's views of their country's economy were strongly linked to their views of democracy. In nine of the 12 countries most dissatisfied with democracy, at least two-thirds of those who said their country's current economic situation is bad also were dissatisfied with democracy. (In the remaining three – Greece, Tunisia and Brazil – so few people said the economy is good that the relationship between views of the economy and of democracy could not be analyzed. In these countries, [90% or more of the public](#) was unhappy with the economy.)

Attitudes toward elected officials also often aligned with the degree to which people were satisfied or dissatisfied with democracy. In the 12 most dissatisfied countries, majorities said the statement “elected officials care what ordinary people think” does *not* describe elected officials well – a view especially common in Greece (90%), Argentina (79%), Spain (79%) and Brazil (78%). In the U.S., 58% described their country as one in which elected officials do not care about the people.

Political corruption was another common concern in the countries most dissatisfied with democracy.

Substantial majorities in seven of these 12 countries said the statement “most politicians are corrupt” describes their country well – including about nine-in-ten (89%) in Greece and roughly six-in-ten or more in South Africa (72%), Nigeria (72%), Italy (70%), the U.S. (69%), Tunisia (67%) and Argentina (63%).

**Majorities in many countries are dissatisfied with their democracy**

% who say they are \_\_\_ with the way democracy is working in their country

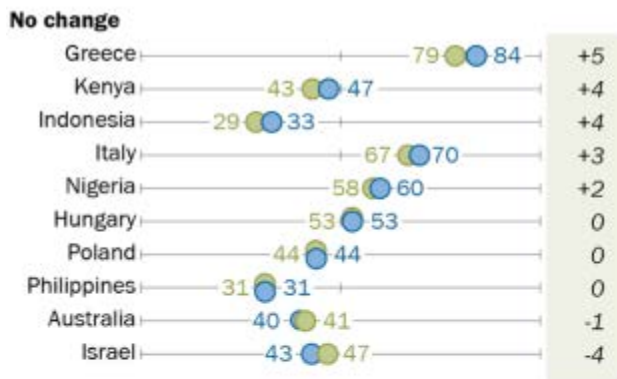

Note: Don't know responses not shown.  
Source: Spring 2018 Global Attitudes Survey.

PEW RESEARCH CENTER

And majorities in seven of the 12 countries most dissatisfied with democracy said that in their country, no matter who wins an election, things do not change very much. Skepticism in elections' ability to change things ran highest among Greeks – 82% of whom doubted their elections led to much change – and was also common in Tunisia (67%), the UK (65%), Japan (62%) and South Africa (61%).

## Dissatisfaction with how democracy is working increased in many countries

% who say they are dissatisfied with the way democracy is working in their country

Note: Statistically significant changes in bold. The chart was updated on April 30, 2019.

Source: Spring 2018 Global Attitudes Survey, Q4.

PEW RESEARCH CENTER

Between 2017 and 2018, dissatisfaction with democracy grew in 14 of the 27 countries surveyed, with the largest increases in India and Germany – as well as Brazil, where two-thirds of the public already had a negative view in 2017. But several countries showed a decrease compared with the previous year. This was most notable in South Korea, where dissatisfaction with democracy fell by 34 percentage points – the largest shift in either direction among countries surveyed. Over this period, President Park Geun-hye [was removed from office](#) on corruption charges and sentenced to 24 years in prison. And although Mexico was the most dissatisfied with democracy of countries surveyed in 2018, the share who expressed dissatisfaction declined by 8 points from a year earlier.

Opinions of the state of democracy weren't bleak everywhere. In eight countries surveyed, four-in-ten or fewer said they were dissatisfied with democracy, with dissatisfaction lowest in Sweden (30%) and the Philippines (31%).
